

Video title: Internet Connection Firewall
TI: 7.5.3

Step 1	Description
#1 Video 1	Setting up the first computer. Start by clicking Start, Control Panel, and Network Connections . A Network Connections window will open double click on the Local Area Connection or in the left window pane click on “View status of this connection”.
#2 Video 1	The Local Area Connection Status window will open. Click Properties under the General tab. This will open the Local Area Connection Properties window.
Step 2	
#3 Video 2	The Local Area Connection Properties window will open click the Advanced tab. Place a check mark in the box and click Setting .
#4 Video 2	In the Advanced Settings window under the Services tab place a check mark in all of the boxes. Click the Security Logging tab and under Logging Options: place a check mark in both boxes then click on the ICMP tab. put a check mark in all of the boxes here also. Click OK .
#5 Video 2	Close all the windows except the Network Connections window. Notice the Local Area connection icon has changed.
